

## UPDATE ON WORK-OVER OPERATIONS

30 June 2011. Triangle Energy (Global) Limited (Triangle Energy) (ASX: TEG) is pleased to provide an update on its work-over operations.

Rig#88 Skytop Brewster has undertaken drilling of temporary cement plugs from Pase A-2 to a depth of 7403 feet. Once total depth is reached Triangle Energy will commence installation of new 4 ½" Chrome completion tubing.

Pase A-2 was drilled as an appraisal well by Mobil in 1984 but was never produced. Three Drill Stem Tests (DSTs) were successfully conducted and a maximum rate of 23.9 MMcf/d was recorded.

Following the work-over of A-2 the rig will be moved 4.2 km to Pase A-1 to remove a blockage inside the existing 7" production string, providing access to an additional 442 feet of lower reservoir.

Triangle Energy looks forward to providing further updates with respect to its work-over program.

### About Triangle Energy:

Triangle Energy is a gas production and exploration company based in Perth. Its wholly-owned subsidiary, TPI, is based in Jakarta and is the 100% holder and operator of the Pase PSC which covers an area of 922km<sup>2</sup> in Aceh Province, North Sumatra, Indonesia.

Triangle Energy has three producing wells. It has been cash-flow positive since early 2010 and continues to operate profitably. Approximately 70% of the gas produced is sold at premium LNG prices. Triangle Energy is continuing to review further acquisition opportunities in the area.
